GUEST: Shane Bradt

No meeting next week!

The committee reviewed properties in Grafton County, moving north up the Pemigewasset River and I-93 through Franconia Notch.

The group discussed LMAC jurisdiction on ponds less than 10 acres. Garret noted that some smaller waterbodies are worth protecting by retaining state-owned lands around them even if they are not within the LMAC's statutory jurisdiction.

John suggests having text around why the committees have made the decisions they have before submitting a final report. Michele agreed and noted that the basis for this has already been created.

Mark will add the Franconia Notch parcel east of I-93 back to the map that Tracie accidentally deleted. He will also update the map in use to show RMAC status.
